#### CAST SLIT POWER RATING:

High and low flame setting (gas only):

Heat input high: NG - 7KW LPG - 7KW

Heat input low: NG - 4.6KW LPG - 4KW

#### OTHER TECHNICAL INFORMATION:

1. ODS (Oxygen Depletion System) to monitor oxygen levels in the room (gas only).
2. For use with chimneys or flues (unaided by mechanical extraction) with an integral free area no less than; 248 cm<sup>2</sup> - Class 1 x 3m minimum length, class 2 - 127cm<sup>2</sup> x 3m length.
3. Chimney/flue must be swept and tested by a registered chimney sweep prior to installation.
4. For air brick requirements please see air brick chart below in relation to high input settings.
5. Approximate running costs per hour on low (subject to your gas supplier tariff): NG - 5.15p LPG - 13.06p
6. The Standard Enclosure is designed for a Class 2 Chimney flue with a diameter of 127mm and a minimum flue length of 3 meters.
7. Gather Unit is available as an optional extra upon request.
8. Rosal Limestone is a soft material which contains fossils, of which the quantity is not controllable. It is very absorbent and is easily marked by liquids and soot which is a natural by-product of a living flame.

CVO reserve the right to amend and improve any of the specification sheets without prior notice.

All fires are living flames. Sooting can occur as a natural bi-product of a living flame and cannot be controlled or eliminated. Weathering and sooting of the enclosures is a natural and normal occurrence. This, understandably is more obvious on light coloured materials such as white stone and white powder coated steel.

Cast bronze and cast iron are hand sand cast and polished. Pitting and air holes are normal and a part of the unique quality of such a piece.
