RIBBON POWER RATING:

Natural Gas : 6.0kw [15p/hour]

Flow Rate : 0.7m³/Hour

LPG/Propane: 6.5kw [50p/hour]

Flow Rate: 0.3m³/Hour

OTHER TECHNICAL INFORMATION:

1. **Gas Types:** Fire available for Natural Gas or LPG/Propane. Specify when ordering.
2. **Control System:**
 - a. Battery Operated Remote Control with IR Magic Eye and Wall Switch.
 - b. Full Sequence – ON/OFF & UP/DOWN.
3. **Chimney System:**
 - a. The fire is supplied with a gather for attachment to a 200mm flue liner – the gather must be fitted.
 - b. As this is a double-sided or “see-through” fire, open on both sides it is likely that mechanical extraction will be required to avoid spillage. Consult a flue specialist for guidance.
 - c. To avoid the use of a fan CVO can supply the fire with a glass panel on one side to retail the double sided appearance with the single sided flue. This must be specified when ordering.
4. **Safety Devices :** ODS (Oxygen Depletion System) and FFD (Flame Failure Device).
5. When installing this fire the enclosure and gather must be sealed to the flue.
6. There is an option to mix fascia materials on either side, please ask for prices
7. **Natural Limestone:** The limestone supplied by CVO Fire is a natural product and every fascia is different in colour, shading and characteristics. Limestone is a soft material which contains fossils and CVO Fire can control the quantity or pattern. If in doubt about natural stone it is suggested to purchase a uniform stone type.
8. **IMPORTANT NOTE: WALL THICKNESS:**
 - a. The standard wall thickness with the stone fascias fitted is 420mm.
 - b. The standard wall thickness with the metal fascias fitted is 460mm.
