

SPECIFICATION SHEET

Angel Fire [Flueless] with Standard Size Fascia

Index # 52, Rev-3 (20 November 2009)

Page 1 of 2

DESCRIPTION:

- This fire is supplied as a suite including Flueless Gas Fire with Metal Fascia.
- The fascia can be supplied in either Satin Black Steel or Brushed Stainless Steel. Other colours/finishes upon request.
- The fire can be installed on any wall within a room as long as a suitable gas supply is available. If the remote version of the fire is used a mains 240v supply is also required.
- If fitting this fire in a room with a chimney, the chimney must be blocked off and sealed before the fire is installed.
- The Fire must only be installed within a room of suitable size. The "Minimum" room size is shown below. This is m³ which can be calculated by this formula – h x w x d. Adjoining spaces not separated by a door can be included.
 - 2.7Kw Version = 27m³
 - 3.5Kw Version = 35m³
- The Fire requires air ventilation with a vent which provides a minimum of "free air" (not the size of the grille) as shown below. This vent must be over 1 meter away from the appliance.
 - 2.7Kw Version = 100cm² "Free Air"
 - 3.5Kw Version = 125cm² "Free Air"
- The Room in which the appliance is to be installed must also have a window which can be opened if required.
- As this is an open flamed appliance consideration should be given to children and elderly or infirm residents and the use of a "fire guard" may be required. These can be purchased from most large DIY stores.
- If the fire is installed lower than 300mm from the floor a hearth will be required.
- There must be a clearance of 1m from the top of the appliance to the ceiling.
- It is not permitted to fit a shelf above this appliance unless the optional extra deflector gather is fitted to the fire. This is a not available as a spare part and must be fitted at the factory and ordered with the fire.
- If you have any technical questions about this appliance please call 01325-301020.

OPTIONS:

- Manual Control – Natural Gas – 2.7kW or 3.5kW
- Manual Control – LPG – 3.5Kw
