OTHER TECHNICAL INFORMATION:

- Gas Types : Fire available for Natural Gas or LPG/Propane. Specify when ordering.
- Control System : Battery Operated Remote Control with IR Magic Eye and Wall Switch (Optional). The remote system is fully sequential – ON/OFF & UP/DOWN.
- Chimney System : Class 2 chimney or Minimum 2 meter x 127mm Flue Liner from above top of gather height.
- Safety Devices : ODS (Oxygen Depletion System) and FFD (Flame Failure Device).
- This fire does not require an air brick.
- It is recommended to buy the standard gather with the fire to ensure correct installation and to stop debris falling into the enclosure. The gather can be fitted into the chimney void, the enclosure slid in then the gather joined back up to the fire. This allows for a smaller construction opening.
- When installing this into an existing chimney with a flue liner the enclosure & gather must be sealed to the existing chimney to ensure that air cannot flow behind the enclosure. Failure to do this will result in serious damage to the burner unit and enclosure.
- For the builders opening please 50mm gap around the sides and back of the unit for adjustments.
- The fascia must be fitted with this fire.
- Gathers are optional depending upon installation requirements. If the standard gather is not to be used, the fire must be connected to the inglenook in accordance with CORGI and local regulations. The gather shown is for dimensional purposes only. The gather can be supplied as an optional extra. Please specify when placing your order.
