

## SPECIFICATION SHEET

### LUCENT GEL FIRE - Standard Fascia Option

A FLUELESS/CHIMNEYLESS FIRE

Page 1 of 2

Index Number : 58, Rev-1

#### MATERIAL OPTIONS:

##### FASCIA OPTIONS:

1. Black Powder Coated Steel
2. Brushed Stainless Steel
3. Other Fascia Materials and Colours upon request.
4. Ceramics can be added if required - please ask.

#### DIMENSIONS:

##### Overall dimensions of the surround:

HEIGHT: 725mm x WIDTH: 840mm x DEPTH: 150mm (steel fascia).

##### Dimensions of standard enclosure opening:

HEIGHT: 265mm x WIDTH: 450mm x DEPTH: 137mm

#### OTHER TECHNICAL INFORMATION:

1. Heat Output - 2.6kW
2. Gel Usage/Hour - 0.58ltr
3. Hung on Wall Design - Recess Backing Plate available to recess into wall. Please ask for details.
4. For volume purchases different Fascia materials, colours and sizes will be considered
5. Ventilation Requirements: No ventilation required however it is advised that the room has a window that can be opened if required.

#### USER INSTRUCTIONS

The gel used in gel fires is an ethanol based fire gel which is smoke and fume free.

The gel is poured into the trough provided which can be filled almost to the top. Ensure any spillages are wiped clean with a damp cloth and removed before lighting.

To light, simply touch the surface of the gel with a naked flame. We advise using a long lighter but matches can also be used. Ensure any used matches are disposed of and not left in the gel as this will cause smoke. After about 1 minute the flame will be at its full height and will burn consistently.

To extinguish replace the lid provided.

Any gel remaining after use can be re-used but more gel should be added to re-light.

Allow some time for the gel to cool before re-filling. Do not re-fill when lit.

Gel can be purchased direct from the Spirit Fires website [www.spiritfires.co.uk](http://www.spiritfires.co.uk)

To service, wash out the trough every four burns to prevent the building up of residue.

In locations where Children or Elderly people are present it is advisable to fit a dress guard or fire guard as this is an open fronted and open flamed appliance.

---

CVO reserve the right to amend and improve any of the specification sheets without prior notice.

All fires are living flames. Sooting can occur as a natural bi-product of a living flame and cannot be controlled or eliminated. Weathering and sooting of the enclosures is a natural and normal occurrence. This, understandably is more obvious on light coloured materials such as white stone and white powder coated steel.

Cast bronze and cast iron are hand sand cast and polished. Pitting and air holes are normal and a part of the unique quality of such a piece.
