

## SPECIFICATION SHEET

### SMALL OVAL FIREBOWL WITH SQUARE ENCLOSURE

(The Fire Bowl is available to buy separately for install into suitable enclosure)

Index # 8, Rev-19

Page 1 of 3

#### MATERIAL OPTIONS:

FIRE BOWL OPTIONS : White Cast Stone, Black Cast Stone, Hand Polished Aluminium or Hand Polished Bronze.

ENCLOSURE OPTIONS : Satin Black Steel, Rosal Limestone, Black Granite, Hand Polished Bronze, Brushed Stainless Steel.

ENCLOSURE FASCIA OPTIONS : The Metal Enclosure has an option to fit a 4pc Fascia made of Stone.

#### CE APPROVAL:

Currently CE tested, approved and available for the following countries:

Natural Gas

(I2H) - G20 - 20mBar - UK, EIRE, AUSTRIA, DENMARK, SPAIN, FINLAND, ITALY, PORTUGAL, SWEDEN, NORWAY & GREECE

(I2E+) - G20/G25 - 20/25mBar - BELGIUM & FRANCE

(I2L) - G25 - 25mBar - NETHERLANDS

(I2E) - G20 - 20mBar - GERMANY & LUXEMBOURG

Propane/LPG

(I3P) - G31 @ 30mBar, 37mBar & 50mBar

#### DIMENSIONS:

Overall dimensions of the Fire Bowl: HEIGHT: 198mm x WIDTH: 490mm x DEPTH: 340mm

Dimensions of enclosure opening [using CVO Enclosure]: HEIGHT: 620mm x WIDTH: 650mm x DEPTH: 470mm

For construction opening see drawings attached on Page 2 [Metal Enclosure] or Page 3 [Stone Enclosure]

#### SMALL OVAL POWER RATING:

The Small Oval Fire Bowl in Manual Control has 2 separate power ratings - High and Low flame. All Fire Bowls are supplied as the Low Power Version unless specified at time of ordering. Note: Due to the increase in power the 9.5Kw version also has an increase in noise. This is out of our control.

#### LOW POWER VERSION- Manual Control Only

Heat Input NG (I2H) (High to Low) 7.4Kw to 5.7Kw

Heat Input LPG (I3P) (High to Low) 7.0Kw to 5.4Kw

#### HIGH POWER VERSION - Manual

Heat Input NG (I2H) (High to Low) 9.5Kw to 7.0Kw

Heat Input LPG (I3P) (High to Low) 9.5Kw to 6.7Kw

#### OTHER TECHNICAL INFORMATION:

1. Rosal Limestone is a soft material which contains fossils, of which the quantity is not controllable. It is very absorbent and is easily marked by liquids and soot which is a natural by-product of a living flame.
2. For use with chimneys or flues (unaided by mechanical extraction) with an internal free area no less than 248cm<sup>2</sup> - Class 1 x 3m length. Chimney/flue must be swept and tested by a registered chimney sweep prior to installation.
3. For air brick requirements please see air brick chart below in relation to high input settings.
4. Approximate running costs per hour on low (subject to your gas supplier tariff): NG - 24p LPG - 71p
5. Manual Control as Standard.
6. Metal Cast Bowls.
  - a. Bowls which are manufactured from Cast Metal are sand cast at a UK Foundry and then Hand Polished for over 15 Hours at the CVO Fire Factory. Pitting and Air Holes are a normal occurrence and are a part of the unique quality of such a hand made piece. All Bowls are inspected and given a full quality control check at the factory. Once the Bowl is installed it will be seen that the overall beauty and uniqueness of your CVO Fire outweighs what is a very minor feature of casting.
7. Noise
  - a. When installing in a Domestic Property it should be noted that all gas fires create noise and this noise increases with the power of the fire.
8. Enclosure
  - a. The Fire has been CE tested to work with the dimensions shown on the Standard CVO Fire Enclosure shown on page 2 and the flue shown in item 3. When installing the fire in a non-Standard enclosure the fire must be installed to ensure it operates safely.
  - b. The gather can be supplied as an optional extra. Please specify when placing your order.

CVO reserve the right to amend and improve any of the specification sheets without prior notice.

All fires are living flames. Sooting can occur as a natural bi-product of a living flame and cannot be controlled or eliminated. Weathering and sooting of the enclosures is a natural and normal occurrence. This, understandably is more obvious on light coloured materials such as white stone and white powder coated steel.

Cast bronze and cast iron are hand sand cast and polished. Pitting and air holes are normal and a part of the unique quality of such a piece.

AIRBRICK CHART	
Input Energy:	
0-7KW	No Airbrick Required
8-9KW	11cm <sup>2</sup> free air
10-15	36cm <sup>2</sup> free air
16-18KW	50cm <sup>2</sup> free air
KEY	
NG	- NATURAL GAS
SF	- SOLID FUEL
LPG	- LIQUID PETROLEUM GAS
ALL DIMENSIONS WITHIN +/- 2mm

NOTE - The dimensions on this product are for a powder coated steel enclosure.

For the builders opening please allow room for adjustments and for the gas and electric supply

Gathers are optional depending upon installation requirements. If the standard gather is not to be used, the fire must be connected to the inglenook in accordance with CORGI and local regulations. The gather shown is for dimensional purposes only. The gather can be supplied as an optional extra. Please specify when placing your order.

CVO reserve the right to amend and improve any of the specification sheets without prior notice.
